Cellular telephone number: 515.460.7729

Email address: United4ape@gmail.com

Screening plan for foster care homes (include criteria for determining if prospective home is capable of caring for animals): All foster homes will need to fill out an application and have a home visit done. The application is found on our website www.goape.info. From that information, we will do a reference check with their veterinarian and do a background check with Iowa Courts Online. We will also verify they own their home. If they do not own their home, their landlord will be contacted.

Oversight plan (include frequency of inspections, criteria to review the home, & remedial actions for inadequate care): Home visits will be done annually if not every six month. At the home visit, we will check to ensure any crating (if being used) is secure and not, rusted, or having sharp edges. We will check the fence, if applicable, to ensure no dog can escape. The room in which the cat box is located for cats, or the crate for dogs needs to have a sealed floor. Our foster contract requires them to be seen at an APE approved vet once every six weeks for a weigh in. The foster agreement also states the animal is the property of the shelter and that we can remove the animal from the foster home without warning.
